Professional Summary

Experienced Laravel/PHP Developer with 6+ years of expertise in backend development, REST APIs, MySQL, and modern web applications. Skilled in building scalable systems, CRM modules, admin dashboards, and integrating third-party services. Strong problem-solving abilities and solid understanding of MVC frameworks.

Work Experience

Sr. Backend Developer | Network Zone 13 | March 2024 – December 2025

- Designed and implemented advanced security protocols including data encryption, secure authentication, and role-based access control (RBAC), reducing unauthorized access.
- Developed a real-time chat platform using web socket enabling instant and secure communication between users.
- Applied input sanitization, throttling, and rate-limiting techniques to safeguard against injection attacks and improve application performance.
- Engineered a time zone-aware appointment booking system for clients and professionals, leveraging jobs and custom Artisan commands to automate scheduling workflows.
- Created a freelance project acquisition platform using Next.js and Python, supporting modern full-stack development and scalable deployment.

PHP / Laravel Developer | Brandhype Digital | Jan 2023 – Jan 2024

- Engineered and deployed 10+ Laravel websites and improving system scalability and reducing downtime.
- Optimized MySQL queries and database structures, cutting response times by 40% and enhancing application performance.
- Integrated secure payment gateways and role-based authentication, ensuring compliance with industry standards.

Software Developer | Web Apprise System| Oct 2022 – Dec 2022

- Engineered a multi-module doctor portal with 20+ integrated modules, enabling doctors to create, manage, and share e cards with patients, boosting appointment scheduling.
- Maintained and enhanced applications with Git/GitHub version control, streamlining team collaboration, branching strategies, and automated deployment work.
- Developed and deployed high-performance web applications using the Laravel framework, implementing caching, queue jobs.
- Applied advanced Object-Oriented Programming (OOP) Principles, Design Patterns, and MVC architecture to deliver robust, maintainable, and reusable codebases.

PHP /CodeIgniter/ Laravel Developer | Miracle Studios| Jan 2021 – Sep 2022

- Collaborated with front-end developers to ensure seamless integration of back-end functionalities with user interfaces, enhancing usability and improving the overall user experience (UX).

- Developed and maintained efacourses.com, implementing features such as a resume builder, quiz module, role-based access control, abandoned cart email automation, frequently bought together recommendations, and Voyager-based admin panel.
- Built, tested, and deployed scalable web applications using PHP, Laravel, and CodeIgniter, following best practices for performance, maintainability, and security.

PHP / CodeIgniter Developer | Crisil Infotech | Jan 2020 – Jan 2021

- Developed modules, APIs, admin dashboards, and backend logics using CodeIgniter.
- Developed and delivered 40+ websites across diverse sectors, including E-commerce, nance, education, religious organizations, salons, and waste management.
- Built robust and user-friendly web applications using CodeIgniter, tailored to meet the unique business requirements of each client.

PHP Developer | Maestros Infotech | Apr 2019 – Aug 2019

- Developed modules, APIs, admin dashboards, and backend logics using Core PHP and CodeIgniter.
- Worked on database design, relationships, query optimization, and MySQL procedures.
- Integrated third-party APIs, payment gateways, authentication, and role-based access systems.

PHP Developer Internship | Dezven Software Solutions | August 2018 – Feb 2019

- Developed modules, APIs, admin dashboards, and backend logics using Core PHP and CodeIgniter.
- Worked on database design, relationships, query optimization, and MySQL procedures.
- Integrated third-party APIs, payment gateways, authentication, and role-based access systems.
