Professional Summary

Laravel Backend Developer with 6+ years of experience building secure, scalable, and high-performance web applications. Proven success in reducing database response times, delivering 40+ client websites, and leading real-time chat and bulk order management projects. Skilled in REST APIs, MySQL optimization, and third-party integrations, with a strong focus on security and performance using Laravel, Next.js, and Python.

Work Experience

Sr. Backend Developer | Network Zone 13 | March 2024 – December 2025

- Designed and implemented secure authentication, RBAC, and data encryption, reducing unauthorized access risks.
- Built a real-time chat system using WebSockets, enabling instant and secure communication.
- Implemented rate limiting, input validation, and throttling to prevent injection and abuse attacks.
- Developed a time zone–aware appointment booking system using Laravel jobs and custom Artisan commands.
- Contributed to a full-stack freelance acquisition platform using Next.js and Python.

PHP / Laravel Developer | Brandhype Digital | Jan 2023 – Jan 2024

- Optimized complex MySQL queries, reducing API response time.
- Integrated secure payment gateways and role-based authentication.

Software Developer | Web Apprise System| Oct 2022 – Dec 2022

- Engineered a multi-module doctor portal with 20+ integrated modules, enabling doctors to create, manage, and share e cards with patients, boosting appointment scheduling.
- Maintained and enhanced applications with Git/GitHub version control, streamlining team collaboration, branching strategies.
- Applied advanced Object-Oriented Programming (OOP) Principles, Design Patterns, and MVC architecture to deliver robust, maintainable, and reusable codebases.

PHP /CodeIgniter/ Laravel Developer | Miracle Studios| Jan 2021 – Sep 2022

- Collaborated with front-end developers to ensure seamless integration of back-end functionalities with user interfaces, enhancing usability and improving the overall user experience (UX).
- Developed and maintained efacourses.com, implementing features such as a resume builder, quiz module, role-based access control, abandoned cart email automation, frequently bought together recommendations, and Voyager-based admin panel.

PHP / CodeIgniter Developer | Crisil Infotech| Jan 2020 – Jan 2021

- Developed modules, APIs, admin dashboards, and backend logics using CodeIgniter.
- Developed and delivered 40+ websites across diverse sectors, including E-commerce, finance, education, tourism, salons, and waste management.

PHP Developer| Maestros Infotech| Apr 2019 – Aug 2019

- Developed modules, APIs, admin dashboards, and backend logics using Core PHP and CodeIgniter.

- Worked on database design, relationships, query optimization, and MySQL procedures.
- Integrated third-party APIs, payment gateways, authentication, and role-based access systems.

PHP Developer Internship| Dezven Software Solutions| August 2018 –Feb 2019
- Developed modules, APIs, admin dashboards, and backend logics using Core PHP and CodeIgniter.
- Worked on database design, relationships, query optimization, and MySQL procedures.
- Integrated third-party APIs, payment gateways, authentication, and role-based access systems.

Skills

Backend Development
Laravel, PHP, CodeIgniter, MySQL, REST APIs, Queues, Jobs

Frontend & UI
Next.js, Vue.js, JavaScript, AJAX, HTML, CSS, Bootstrap

Security & Performance
RBAC, Authentication, Authorization, Encryption, Rate Limiting

DevOps & Tools
Git, GitHub, Deployment, Debugging

Additional Expertise
Python, Flask, Websockets, SaaS Architecture

Education
Bachelor of Computer Applications (BCA) (2018)
